1.0 General Information

Client Information:

Mr. Brian Wharton
The BrickKicker
2736 Royal Lane
PO Box 59254
Dallas, Texas 75229

Subject Property Information:

Commercial Property
Richardson, Texas

Consultant Information:

ETS Environmental & Associates, LLC
Indianapolis, Indiana

Project No:

25-0321A

2.0 Executive Summary

2.1 Subject Property Description

ETS Environmental & Associates, LLC (ETS) has performed a Phase I Environmental Site Assessment (ESA) in accordance with ASTM E1527-21 and 40 C.F.R. Part 312 (Standards and Practices for All Appropriate Inquiries) for a commercial property located at Road, Richardson, Dallas County, Texas (the “Subject Property”). Refer to Appendix A for a Site Map of the Subject Property and adjoining properties.

The Phase I ESA is designed to provide the Client with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the Subject Property.

The Subject Property consists of one (1) parcel of land that is approximately 0.83 acres in size and is located on the east side of N. Plano Road in Richardson, Texas. The Subject Property is bordered by commercial properties to the north, south, and east, and N. Plano Road to the west. The Subject Property is improved with one (1) 4,768 square foot one-story restaurant building. Concrete pavement is located to the north, east, and west of the building. Subsurface utilities that service the Subject Property include water, sanitary sewer, natural gas, and electrical. The Subject Property is currently occupied by Fish Shack, a restaurant.

2.2 Environmental Report Summary

<i>Description</i>	<i>No Further Action</i>	<i>HREC</i>	<i>CREC</i>	<i>REC</i>	<i>De Minimis</i>	<i>Comments</i>
<i>Current Use of Subject Property</i>	X					
<i>Adjoining Property Information</i>	X					
<i>Standard Environmental Records Sources</i>	X					
<i>Historical Summary</i>	X					
<i>Site Reconnaissance</i>	X					

2.3 Findings & Opinions

ETS has not identified any features, activities, uses, or conditions that indicate the presence or likely presence of hazardous substances or petroleum products at the Subject Property.

2.4 Conclusions

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard E1527-21 of Road, Richardson, Texas. Any exceptions to, or deletions from, this practice are described in Section 3.4 of this report.

This assessment has revealed no recognized environmental conditions, controlled recognized environmental conditions, historical recognized environmental conditions, and/or significant data gaps in connection with the Subject Property, as summarized below.

2.4.1 Significant Data Gaps

Data gaps of significance, which would affect the ability of ETS to identify recognized environmental conditions or controlled recognized environmental conditions, were not encountered during the completion of this assessment.

2.4.2 Recognized Environmental Condition (REC)

Potential environmental concerns were evaluated to determine if any rise to the level of a recognized environmental condition (REC). According to ASTM E1527, the term recognized environmental condition is defined as follows:

“(1) The presence of hazardous substances or petroleum products in, on, or at the Subject Property due to release to the environment; (2) The likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; and (3) The presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment. A *de minimis condition* is not a recognized environmental condition.”

A *de minimis condition* is a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

ETS has not identified any RECs in connection with the Subject Property.

2.4.3 Controlled Recognized Environmental Condition (CREC)

Controlled recognized environmental conditions (CREC) were evaluated for the Subject Property. ASTM defines CRECs as:

“A recognized environmental condition affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls.”

ETS has not identified any CRECs in connection with the Subject Property.

2.4.4 Historical Recognized Environmental Condition (HREC)

Historical recognized environmental conditions (HREC) were evaluated for the Subject Property. ASTM defines HRECs as:

“A previous release of any hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the Subject Property to any controls.”

ETS has not identified any HRECs in connection with the Subject Property.

2.5 Recommendations

ETS has no recommendations for further assessment at this time.

3.0 Introduction

3.1 Purpose

The purpose of this Phase I ESA is to identify existing or potential RECs in compliance with “all appropriate inquiries”, as defined by ASTM Standard E1527-21 and 40 C.F.R. Part 312 in connection with the Subject Property.

3.2 Scope of Work

The scope of work for this ESA is in accordance with the requirements of ASTM Standard E1527-21 and 40 C.F.R. Part 312. ETS warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a parcel for the purpose of identifying recognized environmental conditions.

No other warranties are implied or expressed.

3.3 Significant Assumptions

The conclusions and recommendations stated in this report are based upon observations made by employees of ETS and also upon information provided by others. ETS has no reason to suspect or believe that the information provided is inaccurate. However, ETS cannot be held responsible for the accuracy of the information provided by others. The scope of this assessment does not purport to encompass every report, record, or other form of documentation relevant to the property being evaluated.

3.4 Limitations and Exceptions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-21 and 40 C.F.R. Part 312.

To qualify for one of the threshold criteria for satisfying the LLPs to CERCLA liability, the all appropriate inquiries components must be conducted or updated within 180 days of and prior to the date of acquisition of the Subject Property, and all other components of all appropriate inquiries must be conducted within one (1) year prior to the date of acquisition of the Subject Property. The date of the report generally does not represent the date the individual components of all appropriate inquiries were completed and should not be used when evaluating compliance with the 180-day or 1-year all appropriate inquiries requirements.

The dates of the all appropriated inquiries components are as follows:

- Interviews: 03/17/2025
- Search for recorded environmental cleanup liens (User responsibility): N/A
- Regulatory database review: 03/18/2025
- Site visit: 03/17/2025
- Environmental Professional declaration: 04/02/2025

3.5 Deviations

There were no deviations from the Scope of Work.

3.6 Special Terms and Conditions

This Assessment has been performed in accordance with generally accepted environmental practices and procedures, as of the date of the report. Reputable Environmental Professionals practicing in this or similar localities have performed all services employing that degree of care and skill ordinarily exercised under similar circumstances. No other warranty or guarantee, expressed or implied, is made or offered.

The observations contained within this assessment are based upon site conditions readily visible and present at the time of the site inspection. These site observations are unable to specifically address conditions of potential mold, asbestos-containing building materials, subsurface soil, groundwater, or underground storage tanks, unless specifically mentioned. This Phase I ESA does not attempt to address the past or forecast the future Subject Property conditions.

3.7 Reliance

This Phase I ESA has been performed for the exclusive use of The BrickKicker and may not be reproduced, distributed, or relied upon by others without the prior written authorization of The BrickKicker and ETS.

4.0 Site Reconnaissance

4.1 Subject Property Location and Legal Description

The Subject Property consists of one (1) parcel of land that is approximately 0.83 acres in size and is located on the east side of N. Plano Road in Richardson, Texas. The parcel identification number (PIN) for the Subject Property is 422222500506A0000. An abbreviated legal description of the Subject Property is as follows:

BLK 5 LOT 6A ACS 0.8324.

4.2 Subject Property and Adjoining Properties Description

The Subject Property and adjoining properties to the north, south, and east, are zoned 'LR-M(2)' – local retail district. The west adjoining property is zoned 'PD' – planned development.

The Subject Property is bordered by commercial properties to the north, south, and east, and N. Plano Road to the west.

4.3 Current Use of Subject Property

The Subject Property is improved with one (1) 4,768 square foot one-story restaurant building. Concrete pavement is located to the north, east, and west of the building. Subsurface utilities that service the Subject Property include water, sanitary sewer, natural gas, and electrical. The Subject Property is currently occupied by Fish Shack, a restaurant.

4.4 Description of Structures and Other Improvements

<i>Size of Subject Property (approximate)</i>	0.83 acres
<i>Building(s) Size</i>	4,768 square feet
<i>Building(s) Construction</i>	Masonry with a concrete slab foundation.
<i>Building(s) Energy Source(s)</i>	Natural gas and electrical
<i>Adjoining and/or Access/Egress Roads</i>	Access/egress is via N. Plano Road from the west.
<i>Paved or Concrete Areas (including parking)</i>	Concrete pavement is located to the north, east, and west of the building.
<i>Unimproved Areas</i>	No unimproved areas are located on the Subject Property.
<i>Landscaped Areas</i>	No landscaped areas are located on the Subject Property
<i>Surface Water</i>	No surface water is located on the Subject Property
<i>Potable Water Source</i>	City of Richardson
<i>Sanitary System Source</i>	City of Richardson

4.5 Adjoining Properties Information

During the site visit, ETS observed the following land uses on the adjoining properties, the borders of which are contiguous or partially contiguous with that of the Subject Property, or that would be contiguous or partially contiguous with that of the Subject Property but for a street, road, or other public throughfare separating them.

<i>Direction From Subject Property</i>	<i>Occupant</i>	<i>Use</i>	<i>Comments</i>
North	Carnation Auto Spa (car wash)	Commercial	Adjoins immediately to the north of the Subject Property.
South	Arby's (restaurant)	Commercial	Adjoins immediately to the south of the Subject Property.
East	St. Philopateer Coptic Orthodox Church, parking lots	Church	Adjoins immediately to the east of the Subject Property.
West	Strip mall (no current tenants of environmental concern)	Commercial	Adjoins to the west of the Subject Property, beyond N. Plano Road.

4.6 Site Visit

4.6.1 Methodology and Limiting Conditions

The site visit was conducted by Brian Wharton on March 17, 2025. Mr. Wharton was escorted by the owner during the site visit. The weather at the time of the site visit was sunny with a temperature in the upper 60s. Photographs from the site visit are presented in Appendix B.

4.6.2 Drums, Totes, and Intermediate Bulk Containers

<i>Type of Container</i>	<i>Quantity</i>	<i>Contents</i>	<i>Location</i>	<i>Spill Containment (Y/N)</i>	<i>Staining Observed (Y/N)</i>
55-gallon drums	2	Used cooking oil	South of the building	N	N

ETS did not observe any staining on or in proximity to the drums.

4.6.3 PCB-Containing Equipment

<i>Type of Equipment</i>	<i>Quantity</i>	<i>Location</i>	<i>Staining Observed (Y/N)</i>
None			

ETS observed a pad-mounted electrical transformer near the southeast corner of the Subject Property that is not placarded for PCB content. ETS did not observe any staining on or in proximity to transformer.

4.6.4 USTs

<i>Volume (gallons)</i>	<i>Quantity</i>	<i>Contents</i>	<i>Location</i>	<i>Staining Observed (Y/N)</i>
None				

4.6.5 ASTs

<i>Volume (gallons)</i>	<i>Quantity</i>	<i>Contents</i>	<i>Location</i>	<i>Spill Containment (Y/N)</i>	<i>Staining Observed (Y/N)</i>
None					

4.6.6 Interior Staining/Corrosion

ETS did not observe any significant interior staining or corrosion in the building.

4.6.7 Discharge Features

This section includes a discussion of any sewage disposal systems, septic systems, cesspools, drains, sumps, triple traps, and/or water/wastewater discharges observed at the Subject Property during the site visit.

ETS observed a grease trap with three (3) plumbing vent pipes to the south of the building. ETS did not observe any staining on or in proximity to the grease trap or vent pipes.

4.6.8 Pits, Ponds, or Lagoons

This section includes a discussion of manmade or natural depressions in a ground surface that are likely to hold liquids or sludge containing hazardous substances or petroleum products.

ETS did not observe any pits, ponds, or lagoons at the Subject Property.

4.6.9 Solid Waste Disposal/Fill Dirt/Landfilling

ETS did not observe any solid waste disposal, fill dirt, or landfilling at the Subject Property.

4.6.10 Stained Soil or Pavement/Stressed Vegetation

ETS did not observe any stained soil or pavement or any stressed vegetation at the Subject Property.

4.6.11 Wells

This section includes a discussion of any potable wells, dry wells, irrigation wells, injection wells, monitoring wells, abandoned wells, or other wells observed during the site visit.

ETS did not observe any wells at the Subject Property.

5.0 User Provided Information

5.1 Title Records

A 50-year chain-of-title was not requested for this Phase I ESA. The historical use of the Subject Property was researched using other standard historical sources. Refer to Section 6.4 for additional historical documentation.

5.2 Specialized Knowledge

ETS has no specialized knowledge of the Subject Property outside of the research which was conducted and reported as part of this report.

5.3 Activity/Use Limitations

Ms. Cameron Mai, the report “User”, is not aware of any recorded activity and/or use limitations for the Subject Property (Appendix C).

5.4 Valuation Reduction for Environmental Issues

Ms. Cameron Mai, the report “User”, is not aware of a potential valuation reduction for the Subject Property (Appendix C).

5.5 Subject Property Owner, Manager, and Occupant Information

According to Dallas County records, Dollins Mihalopoulos Group Inc. is the Subject Property Owner. The Subject Property is currently occupied by Fish Shack, a restaurant.

5.6 Reason for Performing Phase I

ETS understands that the findings of this study will be used to evaluate a pending purchase in connection with the Subject Property.

6.0 Records Review

6.1 Standard Environmental Records Sources

ETS obtained environmental database information from Environmental Risk Information Service (ERIS). ERIS has searched available state and federal environmental records for the Subject Property and surrounding area to evaluate environmental liabilities and to identify areas of potential concern for the Subject Property. Refer to Appendix D for a copy of the ERIS report.

Regulatory information from the following database sources regarding possible recognized environmental conditions, within the ASTM minimum search distance from the Subject Property, was reviewed.

<i>Database List</i>	<i>Subject Property Listed (Y/N)</i>	<i>Total Number of Listings</i>	<i>Environmental Concern Posed to the Subject Property</i>
Federal NPL (Superfund) Sites (<1 mile)	N	0	None
Federal Delisted NPL Sites (<0.5 mile)	N	0	None
Federal CERCLIS Sites (<0.5 mile)	N	0	None
Federal CERCLIS NFRAP Sites (<0.5 mile)	N	0	None
Federal RCRA CORRACTS Sites (<1 mile)	N	0	None
Federal RCRA TSD Facilities (<0.5 mile)	N	0	None
Federal RCRA Generators (Subject & Adjoining Properties)	N	1	See below
Federal Engineering Controls (Subject Property Only)	N	0	None
Federal Institutional Controls (Subject Property Only)	N	0	None
Federal ERNS Sites (Subject Property Only)	N	0	None
State & Tribal "Superfund" Equivalent Sites (<1 mile)	N	0	None
State & Tribal Hazardous Waste Facilities (<1 mile)	N	0	None
State & Tribal Landfills/Solid Waste Disposal Facilities (<0.5 mile)	N	0	None
State & Tribal LUST Sites (<0.5 mile)	N	4	See below
State & Tribal UST/AST Sites (Subject & Adjoining Properties)	N	1	See below
State & Tribal Voluntary Cleanup Sites (<0.5 mile)	N	0	None
State & Tribal Brownfield Sites (<0.5 mile)	N	0	None
State & Tribal Engineering Controls (Subject Property Only)	N	0	None
State & Tribal Institutional Controls (Subject Property Only)	N	0	None

6.1.1 Subject Property Regulatory Review

The Subject Property is not listed on any of the regulatory databases in the ERIS report.

6.1.2 Adjoining Properties Regulatory Review

The north adjoining property identified as Exxon Mobil Corporation, Stop N Shine, and Exxon Station 6 0426, which is located at 1400 E. Campbell Street, was identified as U.S. Environmental Protection Agency (USEPA) Resource Conservation and Recovery Act (RCRA) non-generator of hazardous waste in 2001 and 2005; however, this adjoining property was formerly identified as a very small quantity generator (VSQG) of benzene in 1991. There are no RCRA compliance monitoring and enforcement (violation) records associated with this adjoining property. This adjoining property is listed by the Texas Commission of Environmental Quality (TCEQ) with one (1) 1,000-gallon used oil underground storage tank (UST) that was removed in 1996 and two (2) 10,000-gallon USTs and one (1) 12,000-gallon UST that were removed in 2015.

There are no reported releases associated with the used oil tank. According to UST closure documents provided by the TCEQ, it appears that the used oil UST was located immediately adjacent to the north Subject Property boundary. Confirmatory soil samples were collected from the excavation following the removal of the used oil UST and analyzed for benzene, toluene, ethylbenzene, and xylenes (BTEX), volatile organic compound (VOC), polyaromatic hydrocarbon (PAH), total petroleum hydrocarbon (TPH), and total metals. Based on the analytical results, it was determined that there were no BTEX, VOC, PAH, or TPH concentrations in the soil samples that exceeded a TNRCC action level, and that some elevated total metals concentrations in the soil samples were attributed to typical background concentrations in native soil. This adjoining property was assigned TCEQ Leaking Petroleum Storage Tank (LPST) identification number 100441 on October 8, 1991, due to a reported petroleum product release. The TCEQ issued a closure letter for incident 100441 on April 4, 1997. ETS contacted Mr. Bruce Yi, TCEQ project manager, who reported that the LPST site was closed with no restrictions. Based upon the regulatory status of this adjoining property, the potential risk for environmental impact to the Subject Property from former USTs on this north adjoining property appears to be low.

Refer to Appendix E for a copy of the reporting documents associated with the removal of the used oil UST.

The west adjoining property identified as Cleaner Plus, which is located beyond N. Plano Road, approximately 135 feet to the west of the Subject Property at 1867 N. Plano Road is listed by TCEQ as a registered drycleaning facility. It should be noted that Cleaner Plus is a tenant within a strip mall and is located over 200 feet from the Subject Property. According to the ERIS report, the drycleaner was a drop station (drop-off facility) in 2004 and 2005. There are no reported spills or releases associated with this site. It should be noted that during the site visit, it was observed that the drycleaner is no longer a tenant at this adjoining property. Based upon the lack of reported spills, the apparent use of the drycleaner as a drop off location, and the apparent distance of this site from the Subject Property, the potential risk for environmental impact to the Subject Property from a former drycleaner tenant on this west adjoining property appears to be low.

6.1.3 Surrounding Sites Regulatory Review

All other sites identified in the ERIS regulatory database report are located at distances that should not represent significant environmental risks to the Subject Property.

6.2 Additional Environmental Record Sources

A summary of records can be found below. Information requests can be found in Appendix E.

City of Richardson Building Department

Contact: Freedom of Information Officer

URL: <https://discovery.cor.gov/public/permits/permitInquiry.nsf/index.html>

Findings: ETS accessed the City of Richardson online portal and found copies of permits associated with plumbing, electrical, sign installation, and certificates of occupancy that were issued between 1997 and 2015, none of which identify an environmental concern in connection with the Subject Property.

City of Richardson Fire Department

Contact: Freedom of Information Officer

Email: AskRichardsonFireDepartment@cor.gov

Findings: ETS submitted an email request for any information on the Subject Property associated with storage tanks, chemical storage, emergency spill responses, and/or violations related to the Subject Property. As of the date of this report, the Fire Department has not responded to the request for information. Since the historical use and development of the Subject Property appears to be adequately documented through alternate sources, the absence of this information does not appear to represent a data gap of significance.

6.3 Physical Setting Sources

6.3.1 Topography

The United States Geological Survey (USGS), Garland, TX Quadrangle 7.5-Minute series topographic map was reviewed for this ESA. This map was published by the USGS in 2022. According to the contour lines on the topographic map, the Subject Property is located at approximately 630 feet above mean sea level (MSL). The contour lines in the area of the Subject Property indicate the area is generally flat.

6.3.2 Surface Water Bodies (including Flood Zones and Wetlands)

The nearest surface water in the vicinity of the Subject Property is a tributary of Spring Creek that is located approximately 0.31 miles to the northwest of the Subject Property. No surface water is located on the Subject Property. No settling ponds, lagoons, surface impoundments, or natural catch basins were observed at the Subject Property during the site visit.

A review of the Flood Insurance Rate Maps, published by the Federal Emergency Management Agency, was performed. According to the ERIS Report the Subject Property is located in Zone X which is identified as an area that is outside a 500-year floor zone. Additionally, according to the National Wetlands Inventory, there are no wetland areas located within 1/8 mile of the Subject Property.

6.3.3 Geology and Hydrology

Based upon soil data available from the Web Soil Survey, the Subject Property is mapped with the following soil types: Houston Black clay that consists of clayey residuum weathered from calcareous mudstone of upper cretaceous age is moderately well drained with a high available water supply and slopes of 1 to 3 percent.

The Subject Property is situated within Dallas County, which is situated within the Blackland Prairies Section of the Gulf Coastal Plains of Physiographic Province of the State of Texas. The shallow subsurface beneath the subject property consists of fluvial, deltaic, and marine deposits, and is underlain by the Austin Chalk Formation, which consists of Cretaceous-age clayey and chalky limestone.

Even though surface topography may be indicative of the direction of surficial water flow or near surface groundwater flow, the more significant deeper groundwater flow direction is more often impacted by subsurface topography, hydrology, hydrogeology, the characteristics of the soil, and the presence of nearby wells. Additionally, groundwater flow velocity is impacted by the nature of the geologic strata.

6.4 Historical Use

6.4.1 Aerial Photographs

Twenty-one (21) aerial photographs provided by ERIS were reviewed for this ESA. Copies of the aerial photographs are included in Appendix F of this report.

<i>Date(s)</i>	<i>Subject Property Comments</i>	<i>Surrounding Area Comments</i>
1942, 1950, 1957, 1964, 1968, 1972	The Subject Property appears to be occupied by farmland.	The adjoining properties appear to be occupied by farmland.
1981	The Subject Property is no longer occupied by farmland and is vacant.	The adjoining properties are no longer occupied by farmland and are vacant.
1984	No significant changes have taken place on the Subject Property.	The west adjoining property has been improved with a strip mall, in configuration similar to the present. A roadway is present to the west of the Subject Property.
1990	The Subject Property appears to consist of a grass-covered lot.	The north adjoining property has been improved with a gasoline station.
1995	No significant changes have taken place on the Subject Property.	The south adjoining property has been improved with a building, in configuration similar to the present.
2004	The Subject Property has been improved with a building, in configuration similar to the present.	The east adjoining property has been improved with buildings and parking lots, in configuration similar to the present.
2005, 2006, 2008, 2010, 2012, 2014	No significant changes have taken place on the Subject Property.	No significant changes have taken place on any adjoining property.
2016	No significant changes have taken place on the Subject Property.	The north adjoining property appears to have been razed and redeveloped with new commercial buildings, in configuration similar to the present.
2018, 2020, 2022	The Subject Property appears to be in a configuration similar to the present.	The adjoining properties in a configuration similar to the present.

6.4.2 Fire Insurance Maps

Fire insurance maps were not reviewed as part of this assessment because there is no coverage of the Subject Property.

6.4.3 Topographic Maps

Six (6) topographic maps provided by ERIS were reviewed for this ESA. Copies of the topographic maps are included in Appendix G of this report.

<i>Date(s)</i>	<i>Subject Property Comments</i>	<i>Surrounding Area Comments</i>
1959, 1959, 1968, 1973	The Subject Property is not depicted with any buildings/structures.	The adjoining properties are not depicted with any buildings/structures. A roadway is present to the west of the Subject Property.
2016, 2019	The map no longer depicts most structures/buildings; however, the Subject Property appears to be in a developed area.	The map no longer depicts most structures/buildings; however, the adjoining properties appear to be in a developed area.

6.4.4 City Directories

A City Directory Report was provided by ERIS in order to provide further information regarding the historical uses of the Subject Property and adjoining properties. A copy of the City Directory Report is included in Appendix H. The following provides a summary of the City Directory Report reviewed by ETS:

<i>Year</i>	<i>Listings for the Subject Property and Adjoining Properties</i>
1961-1980	<i>Address not listed</i>
1985	<i>Address not listed</i> Exxon Mobil (north adjoining property) Springcreek Cleaners (west adjoining property)
1991	<i>Address not listed</i> Exxon Service Station (north adjoining property) Springcreek Cleaners (west adjoining property)
1997	<i>Address not listed</i> Campbell Road Exxon (north adjoining property) Springcreek Cleaners (west adjoining property)
2000	Street Talk Café Campbell Road Exxon (north adjoining property)
2003	Emerald Mist Restaurant & Pub Campbell Road Phillips 66 (north adjoining property)
2008	Purdy's Hamburger Market
2011	Burdy's Hamburger Market Springcreek Cleaners (west adjoining property)
2016	Soulman's Barbeque Inc
2020-2023	Fish Shack 2

6.4.5 Historical Summary

The oldest historical reference for the Subject Property is an aerial photograph from 1942 which shows that the Subject Property was occupied by farmland. By 1981, the Subject Property is no longer occupied by farmland and is vacant. And by 2004, the Subject Property has been improved with a building, in configuration similar to the present. The Subject Property appears in a city directory for the first time in 2000 as Street Talk Café. Based upon this information, it appears that the Subject Property has been utilized for commercial purposes for at least twenty-five (25) years.

ETS did not identify any historical uses of environmental concern on the Subject Property in the City Directory Report.

The City Directory Report and aerial photographs identify the north adjoining property (1400 E. Campbell Street) as a gasoline station from at least 1985-2014. Refer to Section 6.1.2 of this report for a discussion of this adjoining property.

The City Directory Report identifies the west adjoining property (1867 N. Plano Road) as a drycleaner from at least 1985-2011. Refer to Section 6.1.2 of this report for a discussion of this adjoining property.

6.4.6 Other Environmental Reports

ETS did not review any other environmental reports as part of the Phase I ESA investigation.

6.4.7 Vapor Migration

ETS evaluated the Subject Property and adjoining properties in an effort to determine the potential of vapor migration at the Subject Property.

No obvious indications of possible indoor air quality impacts from potential vapor migration were observed or identified during interviews, or regulatory and historical records review.

7.0 Interviews

Interviews were conducted with the following individuals. Findings from these interviews are discussed in the appropriate sections in this report.

<i>Name</i>	<i>Company</i>	<i>Method</i>	<i>Comments</i>
Ms. Cameron Mai	"User"	User Questionnaire (Appendix C)	Ms. Mai is unaware of any known activity and/or use limitations associated with the Subject Property and of any valuation reductions of the Subject Property.
Ms. Julia Mihalopoulos	Owner, Dollins Mihalopoulos Group	Field Screen Questionnaire (Appendix I)	Ms. Mihalopoulos answered 'yes' to the following questions: the past industrial use of the Subject Property; the past use of an adjoining property as a gasoline station; the current presence of drums on the Subject Property; and the past and current presence of a storage tank on the Subject Property.

With reference to the answers given by Ms. Mihalopoulos on the Field Screen Questionnaire, it appears that she is referencing a former north adjoining gasoline station (refer to Section 6.1.2 of this report) as an industrial site and that the Subject Property has never actually been used for industrial purposes. Additionally, it appears that Ms. Mihalopoulos is identifying the below ground grease trap (refer to Section 4.6.7 of this report) as a storage tank.

8.0 Non-Scope Considerations

Hazardous building materials or conditions in a structure may consist of asbestos containing building materials (ACBMs), lead-based paint, mold, and radon, and may be considered a business environmental risk (BER), which is a risk that can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of the Subject Property that is not included within the scope of ASTM E1527. Although an inspection (and sampling) for the presence of such materials was beyond the scope of this assessment, ETS conducted a precursory inspection for the presence of hazardous building materials.

8.1 Asbestos Containing Building Materials

ACBMs were commonly used in building construction prior to 1978. Sprayed-on applications of ACBMs were banned in 1978 and the U.S. Environmental Protection Agency promulgated the Asbestos and Phase-Out Rule in 1989. Since then, controls on the manufacture and distribution of such products have limited their usage.

The building was constructed after the ban of sprayed-on applications and the Phase-Out Rule of ACBMs. Based upon the age of the building, it is unlikely that ACBMs are present within the building.

8.2 Lead-Based Paint

The usage of lead-based paint dramatically declined after 1978. Lead-based paint may be an environmental concern in a structure where old, poorly maintained (peeling and/or cracked) paint is observed.

The building was constructed after the decline of lead-based paint usage. Based upon the age of the building, it is unlikely that lead-based paint is present on or within the building.

8.3 Mold

ETS did not observe any readily identifiable evidence of mold growth or chronic conditions, such as significant water damage, that would be conducive for mold growth within the building.

8.4 Radon

Dallas County is located in Federal EPA Radon Zone 3 (low risk), as defined by indoor average screening levels that are less than 2 pCi/L.

Based upon the commercial use of the Subject Property, as well as the concrete slab-on-grade foundation of the building, radon is not expected to be an environmental concern associated with the Subject Property.

9.0 Signature of Environmental Professional

"I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 C.F.R. Part 312" and

"I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. Part 312."

Signature

10.0 Qualifications of Environmental Professionals

Ms. Vanessa Gonzalez is a staff geologist with over three years of experience in the field of environmental consulting and with over three years of experience with a state regulatory agency. Her primary focus is performing Phase I Environmental Site Assessments for various types of properties for residential, commercial, and industrial purposes, and includes conducting Phase II Environmental Site Assessments for these properties. In addition to these assessments, Ms. Gonzalez has been involved in site remediation activities for Leaking Underground Storage Tanks, State Cleanup Sites, and Voluntary Cleanup Sites within the State of Indiana.

Mr. Brian Kramer holds a Master of Civil Engineering degree with an extensive career spanning over twenty-nine (29) years in the environmental consulting and engineering design fields. His professional journey has involved comprehensive oversight of diverse aspects in the realm of investigations and remedial action for environmental projects. Notably, he has navigated the regulatory landscapes of the IEPA Leaking Underground Storage Tank (LUST) program, the IEPA Site Remediation Program (SRP), the IDEM Leaking Storage Tank (LST) program, and the IDEM Voluntary Remediation Program (VRP). Mr. Kramer's proficiency extends to the successful completion of Phase I assessments, Phase II assessments, and corrective action initiatives across residential, commercial, and industrial sites. These endeavors have consistently culminated in the attainment of a no further action status, often through the implementation of tailored site-specific remedial objectives. His expertise encompasses the application of building control technologies to prevent vapor migration and the utilization of various remedial methods, including in-situ chemical oxidation, bioremediation, and land farming techniques. These methodologies have proven effective in addressing soil, groundwater, and vapor contamination at contaminated sites. Furthermore, Mr. Kramer brings valuable experience in the installation of underground and aboveground storage tank systems. His proficiency extends to wastewater treatment system design, coupled with ensuring compliance with wastewater discharge regulations.

APPENDIX C

User Questionnaire

USER QUESTIONNAIRE

For Landowner Liability Protections (LLP's) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the User must provide the following information (if available) to the environmental professional. As per the Brownfields Amendments, failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

Respondent Name:	Cameron Mai
Signature	<i>Cameron Mai</i>
Response Date:	03/17/2025
Address:	PO Box 2292, Allen, Texas 75013

1. Environmental Liens

Did a search of land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the Subject Property under federal, tribal, state, or local law?

☐ Yes ☒ No

2. Activity and Land Use Limitations (AULs)

Did a search of land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions, or institutional controls that are in place at the Subject Property and/or have been filed or recorded against that Subject Property under federal, tribal, state, or local law?

☐ Yes ☒ No

3. Specialized Knowledge or Experience

Do you have any specialized knowledge or experience related to the Subject Property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the Subject Property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

☐ Yes ☒ No

4. Purchase Price vs. Fair Market Value

Does the purchase price being paid for this Subject Property reasonably reflect the fair market value of the Subject Property? If there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Subject Property?

☒ Yes ☐ No

5. Commonly Known or Reasonably Ascertainable Information

Are you aware of commonly known or reasonably ascertainable information about the Subject Property that would help the environmental professional to identify conditions indicative of releases or threatened releases?

☐ Yes ☒ No

5a. Do you know the past uses of the Subject Property?

☒ Yes ☐ No

5b. Do you know of specific chemicals that are present or were once present at the Subject Property?

☐ Yes ☒ No

5c. Do you know of spills or other chemical releases that have taken place at the Subject Property?

☐ Yes ☒ No

5d. Do you know of any environmental cleanups that have taken place at the Subject Property?

☐ Yes ☒ No

6. Obviousness of the Presence or Likely Presence of Contamination

Based on your knowledge and experience related to the Subject Property, are there any obvious indicators that point to the presence or likely presence of releases at the Subject Property?

☐ Yes ☒ No

7. Reason for Performing the Phase I ESA:

☐ Sale ☒ Purchase ☐ Exchange
☐ Refinance ☐ Other

Violation Status:	RESOLVED		
Violation Allegation:	Failure to maintain corrosion protection on all underground metal components of an underground storage tank system.		
Violation Resolution:	Documentation was received by the TCEQ via email on August 26, 2021. The documentation submitted confirmed that the facility had hired the licensed contractor Huffman Equipment & Service Company to install a sacrificial anode on the metallic piping components under the fuel dispenser. Subsequent operability testing was successfully conducted on August 9, 2021 by the testing company J&S Testing Services. Therefore, no further action is required concerning this alleged violation.

Violation Status:	RESOLVED					
Violation Allegation:	Failure to update the Notice of Registration (NOR) to reflect current waste management activities.					
Violation Resolution:	On May 10, 2016, Ms. Geiger emailed Mr. Townsend a copy of the State of Texas Environmental Electronic Reporting System (STEERS) confirmation page indicating the elementary neutralization unit had been added to the NOR. This resolves the alleged violation and no further action is necessary.

Actv Cd:	IHWSQG					
Violation Status:	RESOLVED					
Violation Allegation:	Failure to notify the TCEQ of the recycling of industrial waste.					
Violation Resolution:	On May 6, 2016, Ms. Geiger emailed Mr. Townsend a copy of the Generator Notification Form for Recycling Hazardous or Industrial Waste for the recycling of their wastewater treatment sludge which was submitted to the TCEQ IHW Waste Permits Section. This resolves the alleged violation and no further action is necessary.

Notice of Violation Date: 05/31/2016
Violation Category: C
Violation Allegation: Failure to update the Notice of Registration (NOR) to reflect current waste management activities.
Violation Resolution: On May 10, 2016, Ms. Geiger emailed Mr. Townsend a copy of the State of Texas Environmental Electronic Reporting System (STEERS) confirmation page indicating the elementary neutralization unit had been added to the NOR. This resolves the alleged violation and no further action is necessary.

Investigation Approved Date:
Notice of Violation ID:
Violation Track No: 604689
Violation Status: RESOLVED
Notice of Violation Date: 05/31/2016
Violation Category: C
Violation Allegation: Failure to maintain records of the location of all satellite accumulation areas (SAAs) used to accumulate hazardous waste at or near their point of generation.
Violation Resolution: On May 23, 2016, Ms. Geiger emailed Mr. Townsend an updated SAA map, which includes the wastewater accumulation in portable drums and a photograph of a portable drum (wastewater SAA container) labeled as "Satellite Accumulation Hazardous Waste." The updated map documenting the location of all SAAs resolves the alleged violation as an Area of Concern. No further action is necessary.

No unplottable records were found that may be relevant for the search criteria.

Unplottable Report

No unplottable records were found that may be relevant for the search criteria.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List:

NPL

The U.S. Environmental Protection Agency (EPA)'s National Priorities List (NPL) includes the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program, based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. This data includes NPL sites represented as polygons, where available, that can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. As site investigation and remediation progress, OUs may be added, modified or refined. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Dec 13, 2024

National Priority List - Proposed:

PROPOSED NPL

Sites proposed by the U.S. Environmental Protection Agency (EPA), the state agency, or concerned citizens for addition to the National Priorities List (NPL) due to contamination by hazardous waste and identified by the EPA as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites represented as polygons, where available, can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Dec 13, 2024

Deleted NPL:

DELETED NPL

Sites deleted from the U.S. Environmental Protection Agency (EPA)'s National Priorities List (NPL). The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. Sites represented as polygons, where available, can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Dec 13, 2024

SEMS List 8R Active Site Inventory:[SEMS](#)

The U.S. Environmental Protection Agency's (EPA) Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. This data includes SEMS sites from the List 8R Active file as well as applicable sites from the EPA's Facility Registry Service map tool.

Government Publication Date: Feb 26, 2025

SEMS List 8R Archive Sites:[SEMS ARCHIVE](#)

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. This data includes sites from the List 8R Archived site file.

Government Publication Date: Feb 26, 2025

Inventory of Open Dumps, June 1985:[ODI](#)

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

EPA Report on the Status of Open Dumps on Indian Lands:[IODI](#)

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

Comprehensive Environmental Response, Compensation and Liability Information System -[CERCLIS](#)**CERCLIS:**

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

CERCLIS - No Further Remedial Action Planned:[CERCLIS NFRAP](#)

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens:[CERCLIS LIENS](#)

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action:[RCRA CORRACTS](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Oct 21, 2024

RCRA non-CORRACTS TSD Facilities:[RCRA TSD](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites that have indicated engagement in the treatment, storage, or disposal of hazardous waste which requires a RCRA hazardous waste permit.

Government Publication Date: Oct 21, 2024

RCRA Generator List:[RCRA LQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Oct 21, 2024

RCRA Small Quantity Generators List:[RCRA SQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Oct 21, 2024

RCRA Very Small Quantity Generators List:[RCRA VSQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Oct 21, 2024

RCRA Non-Generators:[RCRA NON GEN](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Oct 21, 2024

RCRA Sites with Controls:[RCRA CONTROLS](#)

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Oct 21, 2024

Federal Engineering Controls-ECs:[FED ENG](#)

List of Engineering controls (ECs) made available by the United States Environmental Protection Agency (EPA). ECs encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The EC listing includes remedy component data from Superfund decision documents for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Jan 29, 2025

Federal Institutional Controls- ICs:

FED INST

List of Institutional controls (ICs) made available by the United States Environmental Protection Agency (EPA). ICs are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. The IC listing includes remedy component data from Superfund decision documents for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Jan 29, 2025

Land Use Control Information System:

LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Institutional Control Boundaries at NPL sites:

NPL IC

These boundaries of Institutional Control areas at sites on the U.S. Environmental Protection Agency's (EPA) National Priorities List (NPL), or as Proposed or Deleted, are sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). The EPA's NPL includes the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes.

Government Publication Date: Nov 20, 2024

Emergency Response Notification System:

ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System:

ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System:

ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Dec 31, 2024

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:

FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This data is provided by the United States Environmental Protection Agency (EPA) and includes Brownfield sites from the Cleanups in My Community (CIMC) web application.

Government Publication Date: Feb 7, 2024

FEMA Underground Storage Tank Listing:

FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan:

FRP

This listing contains facilities that have submitted Facility Response Plans (FRPs) to the U.S. Environmental Protection Agency (EPA). Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit FRPs. Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments. This listing includes FRP facilities from an applicable EPA FOIA file and Homeland Infrastructure Foundation-Level Data (HIFLD) data file.

Government Publication Date: Jan 9, 2024

Delisted Facility Response Plans:

DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Jan 9, 2024

Historical Gas Stations:

HIST GAS STATIONS

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries:

REFN

This list of petroleum refineries is sourced from the U.S. Energy Information Administration (EIA), Refinery Capacity Report. The listing includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year. The geographic area the report covers is the 50 States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, and other U.S. possessions. Per the EIA, the facility location data represents the approximate location based on research of publicly available information from sources such as Federal agencies, company websites, and satellite images on public websites.

Government Publication Date: Oct 31, 2024

Petroleum Product and Crude Oil Rail Terminals:

BULK TERMINAL

A list of petroleum product and crude oil rail terminals from the U.S. Energy Information Administration (EIA), as well as petroleum terminals sourced from Oak Ridge National Laboratory hosted by the Homeland Infrastructure Foundation-Level Database. Data includes operable bulk petroleum product terminals with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil with activity between 2017 and 2018. EIA petroleum product terminal data comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings.

Government Publication Date: Oct 31, 2024

LIEN on Property:

SEMS LIEN

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) provides Lien details on applicable properties, such as the Superfund lien on property activity, the lien property information, and the parties associated with the lien.

Government Publication Date: Jan 29, 2025

Superfund Decision Documents:

SUPERFUND ROD

This database contains a list of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include completed Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD) for active and archived sites stored in the Superfund Enterprise Management System (SEMS), along with other associated memos and files. This information is maintained and made available by the U.S. Environmental Protection Agency.

Government Publication Date: Feb 26, 2025

State**Superfund Sites Boundaries:**

SUPERFUND

List of sites that may constitute an imminent and substantial endangerment to public health and safety or the environment due to a release or threatened release of hazardous substances into the environment provided by the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: Aug 10, 2021

State Superfund Registry:

SHWS

List of sites identified or evaluated by the Texas Commission on Environmental Quality (TCEQ) which may constitute an imminent and substantial endangerment to public health and safety or to the environment due to a release or threatened release of hazardous substances into the environment. The TCEQ updates the state Superfund sites list in accordance with the Texas Health and Safety Code (THSC). This database serves a purpose similar to that of the federal NPL, functioning as a state-level counterpart for prioritizing cleanup efforts at hazardous substance release sites.

Government Publication Date: Jan 14, 2025

Superfund Site Discovery and Assessment Program:

[SDA](#)

List of active and inactive Superfund Site Discovery and Assessment Program sites queried from the Texas Commission on Environmental Quality (TCEQ) Central Registry and IDA databases by the Remediation Division.

Government Publication Date: Dec 5, 2024

Delisted State Superfund Registry List:

[DELISTED SHWS](#)

List of sites that once appeared on - and have since been removed from - the State Superfund Registry made available by the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: Jan 14, 2025

Permitted Solid Waste Facilities:

[SWF/LF](#)

List of active, inactive, and post-closure Municipal Solid Waste landfills and processing facilities with issued permits and authorizations, as well as pending, withdrawn, or denied applications registered with the Texas Commission on Environmental Quality (TCEQ) under the Texas Administrative Code (TAC) Title 30 Chapter 330.

Government Publication Date: Feb 14, 2025

Closed Landfill Inventory:

[CLI](#)

Inventory of permitted and unauthorized closed or abandoned municipal solid waste landfills throughout Texas compiled by the Texas Commission on Environmental Quality (TCEQ), in collaboration with regional Councils of Government (COG).

Government Publication Date: Late 1990's

Houston-Galveston Closed Landfill Inventory:

[HGAC CLI](#)

List of closed and abandoned landfill sites which fall under the Houston Galveston Area Council of Government. Texas Councils of Governments (COGs) are required to maintain an inventory of closed municipal solid waste landfills for their regional solid waste management plans.

Government Publication Date: Oct 19, 2022

AACOG Closed Landfill Inventory:

[AACOG CLI](#)

A list of permitted and unpermitted closed landfill sites made available by the Alamo Area Council of Governments (AACOG). Alamo Area Council of Governments (AACOG) is requested to maintain an inventory of closed municipal solid waste landfills for their regional solid waste management plans.

Government Publication Date: Feb 6, 2020

Commercial Management Facilities for Hazardous Waste and Industrial Solid Wastes:

[IHW](#)

This publication lists facilities that have permits or authorizations from the Texas Commission on Environmental Quality (TCEQ) to receive, on a commercial basis, and manage hazardous waste, industrial nonhazardous waste, or both.

Government Publication Date: Oct 31, 2022

Industrial and Hazardous Waste - Receivers:

[IHW RECEIVER](#)

List of active, inactive, and post-closure Industrial and Hazardous Waste Receiver Facilities permitted by or registered with the Texas Commission on Environmental Quality (TCEQ) under the Texas Administrative Code (TAC) Title 30 Chapter 335.

Government Publication Date: Dec 3, 2024

Radioactive Waste Sites:

[RWS](#)

This Texas Commission on Environmental Quality (TCEQ) database contains all sites in the State of Texas designated as Radioactive Waste sites as of 2006. The TCEQ no longer maintains this site listing.

Government Publication Date: Jul 11, 2006

Leaking Petroleum Storage Tank Database:

[LPST](#)

List of cleanup sites where contamination was caused by spills, leaks, or other releases of petroleum or hazardous substances from underground and/or aboveground storage tanks regulated by the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: Dec 9, 2024

Delisted Leaking Storage Tanks:[DELISTED LST](#)

List of cleanup sites that once appeared on - and have since been removed from - the list of Leaking Petroleum Storage Tank Cleanups made available by the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: Dec 9, 2024

Underground Petroleum Storage Tanks:[UST](#)

List of facilities that have one or more Underground Storage Tank (UST)s registered and regulated by the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: Jan 23, 2025

Aboveground Storage Tanks:[AST](#)

List of facilities that have one or more Aboveground Storage Tank (AST)s registered and regulated by the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: Jan 23, 2025

Petroleum Storage Tanks Database:[PST](#)

List of facilities included on the list of tank facilities made available by the Texas Commission on Environmental Quality (TCEQ) that have no association as either underground or aboveground tanks.

Government Publication Date: Jan 23, 2025

Historical Tank Construction Notification:[HIST TANK](#)

A list of facilities with historic petroleum storage tank construction notification activity made available by the Texas Commission on Environmental Quality (TCEQ). Any person who intends either to install a new or replacement underground storage tank (UST), to remove a UST from the ground, to conduct a permanent abandonment in-place of a UST, or make any repairs or improvements of a UST must submit a Construction Notification Form.

Government Publication Date: Jan 23, 2025

Austin Underground Storage Tanks:[UST AUSTIN](#)

This inventory of current and historical underground gas storage tanks is provided by the City of Austin's Open Data Portal.

Government Publication Date: Dec 17, 2024

Salt Caverns for Petroleum Storage:[PETROL CAVERN](#)

Listing of salt caverns for petroleum storage, made available by the Railroad Commission of Texas. Salt caverns, constructed in naturally occurring salt domes or salt beds, are used as storage for hydrocarbons including crude oil and natural gases.

Government Publication Date: Sep 1, 2006

Delisted Storage Tanks:[DTNK](#)

List of tank facilities that once appeared on - and have since been removed from - the Petroleum Storage Tanks Database made available by the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: Jan 23, 2025

Sites with Controls:[AUL](#)

Sites under several Texas Commission on Environmental Quality (TCEQ) remediation programs which have institutional or engineering controls.

Government Publication Date: Jan 14, 2025

Voluntary Cleanup Program:[VCP](#)

List of sites which have participated or are currently participating in the Voluntary Cleanup Program (VCP) administered by the Texas Commission on Environmental Quality (TCEQ). The VCP provides administrative, technical, and legal incentives to encourage the cleanup of contaminated sites in Texas.

Government Publication Date: Oct 21, 2024

Texas Railroad Commission Voluntary Cleanup Program:[VCP RRC](#)

List of facilities which have participated in or are currently participating in the Voluntary Cleanup Program (VCP) operated by the Railroad Commission of Texas (RRC). The RRC VCP provides an incentive to remediate Oil & Gas related pollution.

Government Publication Date: Feb 14, 2025

Operator Cleanup Program:[OP CLEANUP](#)

A list of sites in the Texas Railroad Commission (RRC)'s Operator Cleanup Program (OCP). The OCP, under the Site Remediation Section, is tasked with oversight of complex pollution cleanups performed by the oil and gas industry. Complex sites include those that occur in sensitive environmental areas as defined by 16 TAC3.91 (SWR 91) and may require site specific cleanup levels based on risk. When cleanup activities are successfully completed by the operator, Commission staff may issue a "No Further Action" letter acknowledging completion.

Government Publication Date: Dec 5, 2024

Innocent Owner/Operator Program:

[IOP](#)

A list of sites in the Innocent Owner/Operator Program (IOP) made available by Texas Commission of Environmental Quality (TCEQ). IOP provides certificates to innocent owners or operators whom their properties are contaminated as a result of a release or migration of contaminants from a source or sources not located on the property, and they did not cause or contribute to the source or sources of contamination.

Government Publication Date: Feb 10, 2025

Brownfields Site Assessments Database:

[BROWNFIELDS](#)

The Texas Commission on Environmental Quality (TCEQ) Brownfields Site Assessment Program (BSA) layer is used to identify the geographic location of all "Active and Inactive BSA" sites within the State of Texas.

Government Publication Date: Mar 3, 2025

Texas Railroad Commission Brownfields:

[BROWN RRC](#)

List of sites which have participated or are currently participating in the Railroad Commission of Texas (RRC) Brownfields Response Program (BRP). The RRC BRP provides technical and financial support for redevelopment of abandoned oil and gas sites.

Government Publication Date: Feb 14, 2025

Municipal Setting Designation:

[MSD](#)

Municipal Setting Designations (MSD) list is maintained by Texas Commission on Environmental Quality (TCEQ). An MSD is an official state designation given to property within a municipality or its extraterritorial jurisdiction that certifies that designated groundwater at the property is not used as potable water, and is prohibited from future use as potable water because that groundwater is contaminated in excess of the applicable potable-water protective concentration level.

Government Publication Date: Oct 21, 2024

Tribal

Leaking Underground Storage Tanks (LUSTs) on Tribal/Indian Lands:

[INDIAN LUST](#)

This list of leaking underground storage tanks (LUSTs) on Tribal/Indian Lands in Region 6, which includes Texas, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Oct 6, 2017

Underground Storage Tanks on Tribal/Indian Lands:

[INDIAN UST](#)

This list of underground storage tanks (USTs) on Tribal/Indian Lands in Region 6, which includes Texas, is provided by the United States Environmental Protection Agency (EPA).

Government Publication Date: May 7, 2024

Delisted Tribal Leaking Storage Tanks:

[DELISTED INDIAN LST](#)

Leaking Underground Storage Tank (LUST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian LUST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Oct 15, 2024

Delisted Tribal Underground Storage Tanks:

[DELISTED INDIAN UST](#)

Underground Storage Tank (UST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian UST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Oct 15, 2024

County

No County standard environmental record sources available for this State.

Additional Environmental Record Sources

Federal

PFAS Greenhouse Gas Emissions Data:

PFAS GHG

The U.S. Environmental Protection Agency's Greenhouse Gas Reporting Program (GHGRP) collects Greenhouse Gas (GHG) data from large emitting facilities (25,000 metric tons of carbon dioxide equivalent (CO₂e) per year), and suppliers of fossil fuels and industrial gases that results in GHG emissions when used. Includes GHG emissions data for facilities that emit or have emitted since 2010 chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures by DSSTox. PFAS emissions data has been identified for facilities engaged in the following industrial processes: Aluminum Production (GHGRP Subpart F), HCFC-22 Production and HFC-23 Destruction (Subpart O), Electronics Manufacturing (Subpart I), Fluorinated Gas Production (Subpart L), Magnesium Production (Subpart T), Electrical Transmission and Distribution Equipment Use (Subpart DD), and Manufacture of Electric Transmission and Distribution Equipment (Subpart SS). Over time, other industrial processes with required GHGRP reporting may include PFAS emissions data and the list of reportable gases may change over time.

Government Publication Date: Aug 5, 2024

On-Scene Coordinator Response Sites:

OSC RESPONSE

This list of On-Scene Coordinator (OSC) Response Sites is provided by the U.S. Environmental Protection Agency (EPA). OSCs are the federal officials responsible for monitoring or directing responses to all oil spills and hazardous substance releases reported to the federal government. OSCs coordinate all federal efforts with, and provide support and information to local, state, and regional response communities. An OSC is an agent of either EPA or the U.S. Coast Guard (USCG), depending on where the incident occurs. EPA's OSCs have primary responsibility for spills and releases to inland areas and waters. USCG OSCs have responsibility for coastal waters and the Great Lakes. In general, an OSC has the following key responsibilities during and after a response: Assessment, Monitoring, Response Assistance, and Evaluation.

Government Publication Date: Apr 4, 2024

Facility Registry Service/Facility Index:

FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Aug 1, 2024

Toxics Release Inventory (TRI) Program:

TRIS

The U.S. Environmental Protection Agency's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of toxic chemicals from U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. There are currently 770 individually listed chemicals and 33 chemical categories covered by the TRI Program. Facilities that manufacture, process or otherwise use these chemicals in amounts above established levels must submit annual reporting forms for each chemical. Note that the TRI chemical list does not include all toxic chemicals used in the U.S. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment. This database includes TRI Reporting Data for calendar years 1987 through 2021 and Preliminary Data for 2022.

Government Publication Date: Sep 20, 2023

Hazardous Materials Information Reporting System:

HMIRS

The Hazardous Materials Incident Reporting System (HMIRS) database contains unintentional hazardous materials release information reported to the U.S. Department of Transportation, Pipeline and Hazardous Materials Safety Administration.

Government Publication Date: May 29, 2024

National Clandestine Drug Labs:

NCDL

The U.S. Department of Justice ("the Department"), Drug Enforcement Administration (DEA), provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Nov 30, 2023

Toxic Substances Control Act:

TSCA

The U.S. Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule. The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI). EPA CDR collections occur approximately every four years and reporting requirements change per collection.

Hist TSCA:

[HIST TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing:

[FTTS ADMIN](#)

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing:

[FTTS INSP](#)

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List:

[PRP](#)

Early in the site cleanup process, the U.S. Environmental Protection Agency (EPA) conducts a search to find the Potentially Responsible Parties (PRPs). The EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. This listing contains PRPs, Noticed Parties, at sites in the EPA's Superfund Enterprise Management System (SEMS).

Government Publication Date: Nov 20, 2024

State Coalition for Remediation of Drycleaners Listing:

[SCRD DRYCLEANER](#)

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS):

[ICIS](#)

The Integrated Compliance Information System (ICIS) database contains integrated enforcement and compliance information across most of U.S. Environmental Protection Agency's (EPA) programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained by the EPA Headquarters and at the Regional offices. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Government Publication Date: Apr 13, 2024

Drycleaner Facilities:

[FED DRYCLEANERS](#)

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) data as made available by the U.S. Environmental Protection Agency (EPA), sourced from the ECHO Exporter file. The EPA tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: May 5, 2024

Delisted Drycleaner Facilities:

[DELISTED FED DRY](#)

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: May 5, 2024

Formerly Used Defense Sites:

[FUDS](#)

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DOD) is responsible for an environmental restoration. The FUDS Annual Report to Congress (ARC) is published by the U.S. Army Corps of Engineers (USACE). This data is compiled from the USACE's Geospatial FUDS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) FUDS dataset which applies to the Fiscal Year 2021 FUDS Inventory.

Government Publication Date: May 15, 2023

FUDS Munitions Response Sites:

FUDS MRS

Boundaries of Munitions Response Sites (MRS), published with the Formerly Used Defense Sites (FUDS) Annual Report to Congress (ARC) by the U.S. Army Corps of Engineers (USACE). An MRS is a discrete location within a Munitions response area (MRA) that is known to require a munitions response. An MRA means any area on a defense site that is known or suspected to contain unexploded ordnance (UXO), discarded military munitions (DMM), or munitions constituents (MC). This data is compiled from the USACE's Geospatial MRS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) MRS dataset.

Government Publication Date: May 15, 2023

Former Military Nike Missile Sites:

FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents:

PIPELINE INCIDENT

This list of flagged pipeline incidents is made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types. Accidents reported on hazardous liquid gravity lines (§195.13) and reporting-regulated-only hazardous liquid gathering lines (§195.15) and incidents reported on Type R gas gathering (§192.8(c)) are not included in the flagged incident file data.

Government Publication Date: May 6, 2024

Material Licensing Tracking System (MLTS):

MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites:

HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File:

MINES

The Master Index File (MIF) is provided by the United States Department of Labor, Mine Safety and Health Administration (MSHA). This file, which was originally created in the 1970's, contained many Mine-IDs that were invalid. MSHA removes invalid IDs from the MIF upon discovery. MSHA applicable data includes the following: all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970; mine addresses for all mines in the database except for Abandoned mines prior to 1998 from MSHA's legacy system (addresses may or may not correspond with the physical location of the mine itself); violations that have been assessed penalties as a result of MSHA inspections beginning on 1/1/2000; and violations issued as a result of MSHA inspections conducted beginning on 1/1/2000.

Government Publication Date: Feb 5, 2024

Surface Mining Control and Reclamation Act Sites:

SMCRA

This inventory of land and water impacted by past mining (primarily legacy coal mining operations) is maintained by the U.S. Department of the Interior's Office of Surface Mining Reclamation and Enforcement (OSMRE), as it provides information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). This inventory contains information on the type and extent of Abandoned Mine Land (AML) Problems, as well as information on the cost associated with the reclamation of those problems. The data is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed. Disclaimer: Per the OSMRE, States and tribes who enter their data into e-AMLIS (AML Inventory System) may truncate their latitude and longitude so the precise location of usually dangerous AMLs is not revealed in an effort to protect the public from searching for these AMLs, most of which are on private property. If more precise location information is needed, please contact the applicable state/tribe of interest.

Government Publication Date: May 20, 2024

Mineral Resource Data System:

MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2016

DOE Legacy Management Sites:

LM SITES

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) currently manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The LM manages sites with diverse regulatory drivers (statutes or programs that direct cleanup and management requirements at DOE sites) or as part of internal DOE or congressionally-recognized programs, such as but not limited to: Formerly Utilized Sites Remedial Action Program (FUSRAP), Uranium Mill Tailings Radiation Control Act (UMTRCA Title I, Title II), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), Decontamination and Decommissioning (D&D), Nuclear Waste Policy Act (NWPA). This site listing includes data exported from the DOE Office of LM's Geospatial Environmental Mapping System (GEMS). GEMS Data disclaimer: The DOE Office of LM makes no representation or warranty, expressed or implied, regarding the use, accuracy, availability, or completeness of the data presented herein.

Government Publication Date: Dec 12, 2023

Alternative Fueling Stations:

ALT FUELS

This list of alternative fueling stations is sourced from the Alternative Fuels Data Center (AFDC). The U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy launched the AFDC in 1991 as a repository for alternative fuel vehicle performance data, which provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The data includes Biodiesel (B20 and above), Compressed Natural Gas (CNG), Electric, Ethanol (E85), Hydrogen, Liquefied Natural Gas (LNG), Propane (LPG), and Renewable Diesel (R20 and above) fuel type locations.

Government Publication Date: Aug 29, 2024

Superfunds Consent Decrees:

CONSENT DECREES

This list of Superfund consent decrees is provided by the Department of Justice, Environment & Natural Resources Division (ENRD) through a Freedom of Information Act (FOIA) applicable file. This listing includes Cases filed since 2010 limited to the following: Consent Decrees for CERCLA or Superfund Sites filed and/or as proposed within the ENRD's Case Management System (CMS); and applicable ENRD's Environmental Defense Section (EDS) CERCLA Cases with "Consent" in History Note. CMS may not reflect the latest developments in a case, nor can the agency guarantee the accuracy of the data. ENRD Disclaimer: Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA; response is limited to those records that are subject to the requirements of the FOIA; however, this should not be taken as an indication that excluded records do, or do not, exist.

Government Publication Date: Jun 26, 2024

Air Facility System:

AFS

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

Registered Pesticide Establishments:

SSTS

This national list of active EPA-registered foreign and domestic pesticide and/or device-producing establishments is based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that each producing establishment must place its EPA establishment number on the label or immediate container of each pesticide, active ingredient or device produced. An EPA establishment number on a pesticide product label identifies the EPA registered location where the product was produced. The list of establishments is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Feb 29, 2024

Polychlorinated Biphenyl (PCB) Transformers:

PCBT

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

Polychlorinated Biphenyl (PCB) Notifiers:

PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: May 23, 2024

Power Plants:

POWER PLANTS

This list of power plants is provided by the U.S. Energy Information Administration (EIA). The listing includes operable electric generating plants in the United States by energy source, originating from the EIA-860, Annual Electric Generator Report; EIA-860M, Monthly Update to the Annual Electric Generator Report; and EIA-923, Power Plant Operations Report. It includes all operable plants by energy source with a combined nameplate capacity of 1 megawatt or more that are operating, are on standby, or out of service for short- or long-term.

Government Publication Date: Apr 15, 2024

State

Dry Cleaner Remediation Program Prioritization List:

PRIORITY CLEAN

The Texas Commission on Environmental Quality (TCEQ) implements environmental standards for dry cleaners. The Dry Cleaner Remediation Program (DCRP) establishes a prioritization list of dry cleaner sites and administers the Dry Cleaning Remediation fund to assist with remediation of contamination caused by dry cleaning solvents. Includes prioritized sites identified under the DCRP, as well as sites closed under the DCRP.

Government Publication Date: Sep 30, 2024

Registered Dry Cleaning Facilities:

DRYCLEANERS

The Texas Commission of Environment Quality (TCEQ) maintains a statewide registration list of current dry cleaners.

Government Publication Date: Nov 25, 2024

Delisted Drycleaning Facility List:

DELISTED DRYCLEANERS

A list of sites which have been removed from the list of dry cleaning facilities registered with the Texas Commission of Environment Quality (TCEQ). Sites are removed when they are no longer used as dry cleaning facilities.

Government Publication Date: Nov 25, 2024

Groundwater Contamination Cases:

GWCC

List of sites present in the TCEQ Groundwater Contamination Viewer, which represent groundwater contamination cases in Texas as per TCEQ publication SFR-056 (current and some previous years). The Joint Groundwater Monitoring and Contamination Report (SFR-056) was designed and produced by the Texas Groundwater Protection Committee in fulfillment of requirements given in Section 26.406 of the Texas Water Code. The information does not represent an on-the-ground survey and represents only the approximate relative location of property boundaries.

Government Publication Date: Dec 31, 2022

Historical Groundwater Contamination Cases:

GWCC HIST

List of sites from a Joint Groundwater Monitoring and Contamination Report provided by the Texas Commission on Environmental Quality (TCEQ) with the Railroad Commission of Texas (RRC). The annual report describes the status of groundwater monitoring activities conducted or required by each agency at regulated facilities or associated with regulated activities. The report provides a general overview of groundwater monitoring by participating members on a program by program basis. Groundwater contamination is broadly defined in the report as any detrimental alteration of the naturally occurring quality of groundwater.

Government Publication Date: Dec 31, 2018

Affected Property Assessment Reports:

APAR

List of sites for which an Affected Property Assessment Report has been submitted to the Texas Commission on Environmental Quality (TCEQ). An APAR is required when a person is addressing a release of COCs under 30 TAC Chapter 350, the Texas Risk Reduction Program (TRRP). The purpose of the APAR is to document all relevant affected property information to identify all release sources and chemicals of concern (COCs), determine the extent of all COCs, identify all transport/exposure pathways, and to determine if any response actions are necessary.

Government Publication Date: Oct 30, 2024

Spills Database:

SPILLS

List of Spills reported to Emergency Response Division of the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: Jan 17, 2025

Industrial and Hazardous Waste Sites with Corrective Actions:

IHW CORR ACTION

This list of active and inactive Industrial and Hazardous Waste Sites with Corrective Actions is made available by the Texas Commission of Environmental Quality (TCEQ). The mission of TCEQ's Industrial and Hazardous Waste Corrective Action Program (IHWCA) is to oversee the cleanup of sites contaminated from industrial and municipal hazardous and industrial nonhazardous wastes.

Government Publication Date: Sep 25, 2024

Land Application Permits:

LAND APPL

Texas Land Application Permits are a requirement from the Texas Commission on Environmental Quality for any domestic facility that disposes of treated effluent by land application such as surface irrigation, evaporation, drainfields or subsurface land application.

Government Publication Date: Dec 17, 2024

Notice of Violation:

NOV

List of sites that have been sent a Notice of Violation (NOV) by the Texas Commission on Environmental Quality (TCEQ) Office of Compliance and Enforcement. A Notice of Violation is sent out when a site falls out of compliance and has a prescribed time period to return to compliance.

Government Publication Date: Sep 17, 2024

Notices of Enforcement:

NOE

Listing of investigations resulting in a Notice of Enforcement (NOE), made available by the Texas Commission on Environmental Quality, Office of Compliance & Enforcement. Multiple violations may be due to identified noncompliance with different regulatory requirements (citations).

Government Publication Date: Dec 30, 2024

Environmental Liens Listing:

LIENS

List of sites/facilities against which the Texas Commission on Environmental Quality (TCEQ) has placed liens to recover cleanup costs associated with Federal or State Superfund cleanup activities.

Government Publication Date: Jan 14, 2025

Court Orders & Administrative Orders:

ORD

List of sites that have been sent an Administrative Order or Court Order by the Texas Commission on Environmental Quality (TCEQ) Office of Compliance and Enforcement.

Government Publication Date: Oct 2, 2024

Inactive RCRA and Non-RCRA Facilities:

HIST RCRA NONRCRA

A list of inactive or no longer registered Resource Conservation and Recovery Act (RCRA) and non-RCRA facilities, provided by the Texas Commission on Environmental Quality (TCEQ). This list includes both hazardous and non-hazardous waste generators, transporters, and receivers. If an unregistered/inactive industrial site generates less than 220 pounds of hazardous or Class 1 industrial waste, it does not have to notify or report to the TCEQ.

Government Publication Date: Aug 29, 2024

Recycle Texas Online Program:

RTOL

A list of recycling facilities under the Recycle Texas Online service/program made available by the Texas Commission of Environmental Quality (TCEQ). This program allowed facilities to self-report and post their own company/facility information. This program is no longer maintained and these data will not be updated.

Government Publication Date: Oct 10, 2011

Underground Injection Control:

UIC

List of underground injection control (UIC) permits in the Texas Commission on Environmental Quality (TCEQ) Central Registry database. Includes Class I, Class III, Class IV, Class 5, and non permitted UICs; does not include injection wells regulated by the Railroad Commission of Texas.

Government Publication Date: Jan 24, 2025

Industrial and Hazardous Waste - Generators:

[IHW GENERATOR](#)

List of active, inactive, and post-closure Industrial and Hazardous Waste Generator Facilities permitted by or registered with the Texas Commission on Environmental Quality (TCEQ) under the Texas Administrative Code (TAC) Title 30 Chapter 335.

Government Publication Date: Dec 3, 2024

Industrial and Hazardous Waste - Transporters:

[IHW TRANSPORT](#)

List of active, inactive, and post-closure Industrial and Hazardous Waste Transporter Facilities permitted by or registered with the Texas Commission on Environmental Quality (TCEQ) under the Texas Administrative Code (TAC) Title 30 Chapter 335.

Government Publication Date: Dec 3, 2024

New Source Review (NSR) Permits:

[AIR PERMITS](#)

A list of facilities that have applied for New Source Review air permits made available by the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: Dec 19, 2024

Point Source Emissions Inventory:

[EMISSIONS](#)

A list of Texas Commission on Environmental Quality (TCEQ) Point Source Emissions Inventory sites. The Point Source Emissions Inventory is an annual survey of chemical plants, refineries, electric utility plants and other industrial sites that meet the reporting criteria in the TCEQ emissions inventory rule (30 TAC §101.10Exit the TCEQ).

Government Publication Date: Dec 31, 2023

Tier 2 Report:

[TIER 2](#)

Historical listing of facilities in Texas that store hazardous chemicals and are required to report them under the Emergency Planning and Community Right-to-Know Act (EPCRA) of 1986. This data was provided by the Department of State Health Services (DSHS) and contains facility reports for the 2005 through the 2012 calendar years. Since 2012, agencies are unable to release this listing, as Tier II information is confidential under Texas Government Code Chapter 418, the Texas Disaster Act (TDA). Site specific inquiries can be made to the Texas Commission on Environmental Quality Tier II Chemical Reporting Division.

Government Publication Date: Dec 31, 2012

Edwards Aquifer Permits:

[EDWARDS AQUIFER](#)

Listing of Edwards Aquifer permits made available by the Texas Commission on Environmental Quality (TCEQ). The Edwards Aquifer is home to diverse fauna and is a drinking water source for the city of San Antonio and surrounding central Texas communities. Before building on the recharge, transition, or contributing zones of the Edwards Aquifer, a plan must first be reviewed and approved by the TCEQ Edwards Aquifer Protection Program.

Government Publication Date: Jul 18, 2024

Tribal

No Tribal additional environmental record sources available for this State.

County

No County additional environmental record sources available for this State.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

To Whom It May Concern:

ETS Environmental & Associates, LLC (ETS) is conducting a Phase I Environmental Site Assessment for the above referenced property. The purpose of this letter is to serve as an official request for public records relating to any underground storage tank (UST), above ground storage tank (AST), emergency spill responses, or other pertinent Department information. Please note this request for information is for commercial purposes only.

Copies of records may be sent by electronic mail to: vanessag@ets-environmental.com. If you have any questions, please do not hesitate to call me at (317) 361-4645. Thank you for your assistance.

Sincerely,

Vanessa Gonzalez
Staff Geologist
ETS Environmental & Associates, LLC

APPENDIX C:

**Sample Collection and Handling Procedures
and
UST Removal Activities and Description**

SAMPLE COLLECTION AND HANDLING PROCEDURES

Two composite samples of native soil were collected from the floor and walls of the used oil tank pit. Samples collected from native soil during the tank excavation were collected from freshly exposed soil surfaces. One composite sample was collected from fill material removed from the used oil tank pit. Upon collection, all samples were placed in clean glass sample jars with Teflon lids (supplied by the laboratory). The samples were then labeled and placed on ice in clean laboratory supplied coolers, and delivered under chain-of-custody to Inchcape Testing Services, in Richardson, Texas.

At the laboratory, the composite floor and composite wall samples were analyzed for total petroleum hydrocarbons (TPH - EPA 418.1), Total Benzene, Toluene, Ethylbenzene and Xylenes (BTEX - EPA 8020), Volatile Organic Compounds (VOC - EPA 8240), Polynuclear Aromatic Hydrocarbons (PAH - EPA 8310), and total metals (EPA 6010A, 7060, 7471, or 7740) analyses. The stockpile sample was analyzed for TPH, BTEX, and Total Metals.

Copies of laboratory reports, chains-of-custody, and QA/QC documentation are included in Appendix D. Original laboratory reports are on file at EA's office in Carrollton, Texas.

UST REMOVAL ACTIVITIES AND DESCRIPTION

One 1,000 gallon fiberglass used oil UST was excavated and permanently removed from service at Exxon 6-0426, 1400 E. Campbell Road, on September 17, 1996. The site had previously been assigned LPST number 110829 after a gasoline release in 1991. The removal of the UST was performed by Wright Pump Company of Fort Worth, Texas in accordance with TNRCC regulations as described in Texas Administrative Code, Chapter 334 (Underground and Aboveground Storage Tanks), Subchapter C. Before removal, the UST was rinsed by Mobley Environmental Services of Corsicana, Texas, using a mixture of detergent and water. After rinsing, the UST was emptied of all rinse water and purged of residual vapors. Approximately 120 gallons of rinse water were removed from the UST and transported by Mobley to its Corsicana, Texas disposal facility. After rinsing, the atmosphere inside the UST was monitored for explosive conditions using an explosimeter. Visual inspection indicated that the tank was in good condition and showed no evidence of damage or leakage. The UST was then properly labeled, loaded onto a flatbed trailer, and transported to Hughes Tank Company of Venus, Texas for final disposition. Fiberglass fill and vent lines were not removed, but abandoned in place by capping and filling with concrete.

After the used oil UST was removed, remaining fill material was excavated to expose native soil on the walls and floor of the tank pit. Following the removal of this material, one composite soil sample was collected from the walls and one composite sample collected from the floor of the tank pit. One composite sample was collected from the stockpiled soil and fill material (pea gravel) for waste characterization.

Analytical results for the composite wall soil sample showed non-detectable hydrocarbon concentrations. Analytical results for a composite sample collected from the floor showed non-detectable concentrations of BTEX, VOC, PAH, and a TPH concentration of 37 mg/Kg which is below TNRCC action levels (TNRCC-0621, 8/1/96). Analytical results for the stockpile soil sample showed Total Xylenes concentration of 2.3 ug/Kg and a TPH concentration of 65 mg/Kg which is also below TNRCC action levels. Total metals analyses of all soil samples showed concentrations of total metals that may be attributed to typical background concentrations in native soil. After receiving analytical results the fill material was returned to the tank pit as fill material. Results of the hydrocarbon laboratory analyses are shown in Table 1, results of metals laboratory analyses are shown in Table 2, and copies of laboratory reports, chains-of-custody and QA/QC documentation are included in Appendix D. Original laboratory reports are on file at EA's office in Carrollton, Texas.

APPENDIX G

Topographic Maps

TOPOGRAPHIC MAPS

Project Property: Phase I ESA - Road, Plano, TX

1840 North Plano Road
Plano TX 75081
Project No: 25-0321A
Requested By: ETS Environmental & Associates, LLC
Order No: 25031400857
Date Completed: March 16, 2025

We have searched USGS collections of current topographic maps and historical topographic maps for the project property. Below is a list of maps found for the project property and adjacent area. Maps are from 7.5 and 15 minute topographic map series, if available.

Year	Map Series
2019	7.5
2016	7.5
1973	7.5
1968	7.5
1959	7.5
1959	15

Topographic Map Symbolology for the maps may be available in the following documents:

RE: CITY DIRECTORY RESEARCH
1840 North Plano Road
Richardson, TX 75081

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:

1200-1500 of E Campbell Rd
1700-2100 of N Plano Rd

Search Notes:

APPENDIX I

Field Screen Questionnaire

To be Completed by Seller or Seller Representative
Party and Returned to dfwrequest@brickkicker.com

Phase I
Environmental Site Assessment
Field Screen Questionnaire

Site Address Rd, Richardson, TX 75081

Yes ☐ No ☒ Unkwn ☐

(1a) Is the Subject Property used for an industrial use?

Yes ☐ No ☒ Unkwn ☐

(1b) Is an adjoining property used for an industrial use?

Yes ☐ No ☒ Unkwn ☐

(2a) Do you have any prior knowledge that the Subject Property has been used for an industrial use in the past?

Yes ☒ No ☐ Unkwn ☐

(2b) Do you have any prior knowledge that an adjoining property has been used for an industrial use in the past?

Yes ☐ No ☒ Unkwn ☐

(3a) Is the Subject Property currently used as a gasoline station, motor repair facility, commercial printing facility, drycleaner, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?
(circle any applicable uses)

Yes ☐ No ☒ Unkwn ☐

(3b) Is an adjoining property used as a gasoline station, motor repair facility, commercial printing facility, drycleaner, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?
(circle any applicable uses)

Yes ☐ No ☒ Unkwn ☐

(4a) Do you have any prior knowledge that the Subject Property has been used in the past as a gasoline station, motor repair facility, commercial printing facility, drycleaner, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility? (circle any applicable uses)

Yes ☒ No ☐ Unkwn ☐

(4b) Do you have any prior knowledge that an adjoining property has been used in the past as a gasoline station, motor repair facility, commercial printing facility, drycleaner, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility? (circle any applicable uses)

Yes ☐ No ☒ Unkwn ☐

(5a) Are there currently any damaged or discarded automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of >5 gal (19 L) in volume or 50 gal (190 L) in the aggregate, stored on or used at the Subject Property or at the facility?

Yes ☐ No ☒ Unkwn ☐

(5b) Do you have any knowledge of the past presence of damaged or discarded automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of >5 gal (19 L) in volume or 50 gal (190 L) in the aggregate, stored on or used at the Subject Property or at the facility?

Yes ☒ No ☐ Unkwn ☐

(6a) Are there currently any industrial drums (typically 55 gallon) or sacks of chemicals located on the Subject Property or at the facility?

Yes ☐ No ☒ Unkwn ☐

(6b) Do you have any knowledge of the past presence of industrial drums (typically 55 gallon) or sacks of chemicals located on the Subject Property or at the facility?

Yes ☐ No ☒ Unkwn ☐

(7a) Do you have any prior knowledge that fill dirt has been brought onto the Subject Property that originated from a contaminated site?

Yes ☐ No ☒ Unkwn ☐

(7b) Do you have any prior knowledge that fill dirt has been brought onto the Subject Property that is of an unknown origin?

Yes ☐ No ☒ Unkwn ☐

(8a) Are there currently any pits, ponds, or lagoons located on the Subject Property in connection with waste treatment or waste disposal?

Yes ☐ No ☒ Unkwn ☐

(8b) Do you have any prior knowledge of the past presence of any pits, ponds, or lagoons located on the Subject Property in connection with waste treatment or waste disposal?

Yes ☐ No ☒ Unkwn ☐

(9a) Is there currently any stained soil on the Subject Property?

Yes ☐ No ☒ Unkwn ☐

(9b) Do you have any prior knowledge of the past presence of stained soil on the Subject Property?

Yes ☒ No ☐ Unkwn ☐

(10a) Are there currently any registered or unregistered storage tanks (aboveground or underground) located on the Subject Property?

Yes ☒ No ☐ Unkwn ☐

(10b) Do you have any prior knowledge of the past presence of registered or unregistered storage tanks (aboveground or underground) located on the Subject Property?

Yes ☐ No ☒ Unkwn ☐

(11a) Are there currently any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the Subject Property or adjacent to any structure located on the Subject Property?

Yes ☐ No ☒ Unkwn ☐

(11b) Do you have any prior knowledge of the past presence of vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the Subject Property or adjacent to any structure located on the Subject Property?

Yes ☐ No ☒ Unkwn ☐

(12a) Is there currently any evidence of leaks, spills, or staining by substances other than water, or foul odors, associated with any flooring, drains, walls, ceilings, or exposed grounds on the Subject Property?

Yes ☐ No ☒ Unkwn ☐

(12b) Do you have any prior knowledge of past leaks, spills or staining by substances other than water, or foul odors, associated with any flooring, drains, walls, ceilings, or exposed grounds on the Subject Property?

Yes ☐ No ☒ Unkwn ☐

(13a) If the Subject Property is served by a private potable water well or non-public water system, is there evidence or do you have prior knowledge that contaminants were identified in the well or system that exceeded guidelines applicable to the water system?

Yes ☐ No ☒ Unkwn ☐

(13b) If the Subject Property is served by a private potable water well or non-public water system, is there any evidence or do you have prior knowledge that the well was designated as contaminated by a government environmental/ health agency?

Yes ☐ No ☒ Unkwn ☐

(14) Does the owner or occupant of the Subject Property have any knowledge of environmental liens or governmental notifications relating to past or recurrent violations of environmental laws with respect to the Subject Property or any facility located on the Subject Property?

Yes ☐ No ☒ Unkwn ☐

(15a) Has the owner or occupant of the Subject Property been informed of the current existence of hazardous substances or petroleum products with respect to the Subject Property or any facility located on the Subject Property?

Yes ☐ No ☒ Unkwn ☐

(15b) Has the owner or occupant of the Subject Property been informed of the past existence of hazardous substances or petroleum products with respect to the Subject Property or any facility located on the Subject Property?

Yes ☐ No ☒ Unkwn ☐

(15c) Has the owner or occupant of the Subject Property been informed of the current existence of environmental violations with respect to the Subject Property or any facility located on the Subject Property?

Yes ☐ No ☒ Unkwn ☐

(15d) Has the owner or occupant of the Subject Property been informed of the past existence of environmental violations with respect to the Subject Property or any facility located on the Subject Property?

Yes ☐ No ☒ Unkwn ☐

(16) Does the owner or occupant of the Subject Property have any knowledge of any environmental site assessment of the Subject Property or facility that indicated the presence of hazardous substances or petroleum products on, or contamination of, the Subject Property or recommended further assessment of the Subject Property?

Yes ☐ No ☒ Unkwn ☐

(17) Does the owner or occupant of the Subject Property have knowledge of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the Subject Property by any owner or occupant of the Subject Property?

Yes ☐ No ☒ Unkwn ☐

(18a) Does the Subject Property discharge wastewater (not including sanitary waste or storm water) onto or adjacent to the Subject Property and/or into a storm water system?

Yes ☐ No ☒ Unkwn ☐

(18b) Does the Subject Property discharge wastewater (not including sanitary waste or storm water) onto or adjacent to the Subject Property and/or into a sanitary sewer system?

Yes ☐ No ☒ Unkwn ☐

(19) Do you have any prior knowledge that any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries, or any other waste materials have been dumped above grade, buried, and/or burned on the Subject Property?

Yes ☐ No ☒ Unkwn ☐

(20) Is there a transformer, capacitor, or any hydraulic equipment for which there are any records indicating the presence of PCBs?

Yes ☐ No ☒ Unkwn ☐

(21) To the best of your knowledge, in the past or the present have asbestos-containing building materials ever been present in the building(s)?

Yes ☐ No ☒ Unkwn ☐

(22) To the best of your knowledge, in the past or the present, has lead-based paint ever been present in the building(s)?

Yes ☐ No ☒ Unkwn ☐

(23) To the best of your knowledge, in the past or the present, has mold or significant water damage ever been identified within the building(s)?
